

KEBS BCMS POLICY

KEBS is committed to ensuring the implementation of a robust and effective Business Continuity Management System (BCMS) as a key mechanism to build organizational resilience, react, and respond to incidents and emergencies, while protecting life and wellbeing of staff and stakeholders. This will enable KEBS to prepare, protect against, restore and deliver continuity of prioritized activities in Standardization, Metrology & Conformity Assessment services and related enabling activities in the event of a disruptive incident.

In line with this, KEBS has established Business Continuity objectives in all functions within the scope. We commit to meet the identified legal and interested parties' requirements and continually improve the effectiveness of the BCMS.

This policy shall be reviewed after every three years while related objectives shall be reviewed on an annual basis or when significant changes occur.
