SECTION VI DESCRIPTION OF SERVICES**6.1 General Information****6.1.1 Introduction**

Pre-Export Verification of Conformity (PVoC) to Standards is a conformity assessment programme to certify that products imported into Kenya comply with the applicable Kenya Standards or approved specifications and technical regulations before shipment.

Under PVoC regime, products to be imported shall undergo verification and/or testing at country of supply (Exporting) and a Certificate of Conformity (CoC) issued demonstrating that the products meet the applicable standards and regulations. Where the products fail to meet the approved specifications, a Nonconformity Report (NCR) shall be issued and such goods shall not be allowed for importation into Kenya.

The conformity assessment elements undertaken in PVoC include but are not limited to physical inspection prior to shipment, sampling, testing and analysis in accredited or approved laboratories, audit of production processes and systems, and documentary check of conformity to regulations and overall assessment of conformity to specifications.

The purpose of this tender is to recruit qualified companies ("Contractors") to provide Pre-Export Verification of Conformity to Standards on behalf of the Kenya Bureau of Standards ("The Client").

6.2 Determination of Conformity of Products to Standards

6.2.1 Certification services shall be provided for all products except those exempted as outlined in the PVoC manual available for download at www.kebs.org.

Tenderers are notified that KEBS reserves the right to amend the scope of products at any time during the term when services under this contract are being provided.

6.2.2 Each shipment of goods or products subject to PVoC shall be accompanied by a Certificate of Conformity (CoC). The methods employed for achieving these requirements vary according to the nature of product, and the level of risk inherent in the shipment.

6.2.3 The Kenya Bureau of Standards has determined four routes that shall be applied as appropriate conformity assessment procedures for product subject to PVoC, according to type, risk and effect on the health and safety, and environmental protection. The routes are:

Route A: (Inspection and testing) *this is for high-risk products.*

Route B: (product registration and surveillance)

This is based on of supplier's ability to consistently meet the quality requirements.

Route C: (Licensing and surveillance)

Kenya Bureau of Standards

Route D: Inspection and verification of consolidated goods- This is route is strictly for KEBS registered consolidators.

The four routes of certification/ verification are part and parcel of this tender and are appended as Annex 1, Annex 2 Annex 3 and Annex 4 respectively.
